RUST PROGRAMMING

Presentation by

Surendra Varma Pericherla

Rust Comments

used to describe the purpose of code

Example

```rust
// entry point of the program
fn main() {
    // print text on the screen
    println!("Hello, World!");
}
```

Types of Comments

- // - Line Comment
- /*...*/ - Block Comment

Line Comment in Rust

```rust
fn main () {
    // declare a variable
    let x = 100;
    println!("x = {}", x);
}
```

Block Comment in Rust

```rust
fn main() {
    /*
    declare a variable
    and assign value to it
    */
    let x = 100;
    println!("x = {}", x);
}
```
